Liquefied Natural Gas (LNG)
Some continuing research re. Penn America at Chester, PA

9.29.22
Proposed Gibbstown Liquefied Natural Gas (LNG) Export Terminal is 1.94 miles from Chester.
New Natural Gas Pipeline would be needed
Sabine Pass; Cheniere Energy, Inc.
Cheniere Energy; Corpus Christi Bay, the La Quinta Channel in San Patricio Co., TX
What is LNG and What are its Hazards

- Liquefied Natural Gas - LNG
- Hazardous, flammable, cooled to -260 F
- Release Cannot be Controlled
- Expands 600 times in volume
- Cold vapor kills, vapor cloud moves
- Fire so hot it cannot be extinguished
- Explodes w/force of thermobaric bomb
- Emergency response – lacks training
- Public safety not sufficiently examined
- Gov’t secrecy cloaks disaster risk
