

Dear New Jerseyans,

Please join the New Jersey Coalition against Fracking – we have all been fighting for a ban on frack waste being dumped in New Jersey and for fracking to be banned in the State. We have also worked as a coalition for renewable energy programs and for a rewrite of Governor Christie’s retrograde Energy Master Plan to employ truly clean and sustainable energy sources with an emphasis on energy efficient and conservation from the top down. We have worked through the Legislature, through the public process, and in New Jersey communities. But Governor Christie is stonewalling the clamor for a clean and sustainable energy future by blocking our path.

He has vetoed the frack waste ban and the ban on fracking in the State that were both passed by a landslide with bipartisan support over the last two legislative sessions and his backward-thinking Energy Master Plan relies heavily on fossil fuels and calls for more pipelines and gas infrastructure. His actions are exposing New Jersey’s communities and our drinking water to pollution from toxic waste dumping and the specter of drilling and fracking in the most densely populated state in the nation. This is unacceptable!

That's why our New Jersey coalition against fracking is going on the offense this fall with the launch of a new [Bird-dog Governor Christie Rapid Response Network](#). Our goal is simple. No matter where Governor Christie is, we will be there to greet him with a resounding message: "Our communities are not for sale to the oil and gas industry. Governor Christie, ban frack waste and fracking now!"

The Bird-dog Christie Rapid Response Network is a collaboration of impacted community members and concerned residents in New Jersey who are committing to participate in one or more "bird-dogging" actions at Governor Christie's public events this fall.

By joining the Bird-dog Christie Rapid Response Network, you will be notified through email and/or text message of events that may be scheduled down the road or in a few hours. We will keep you abreast of campaign tactics and ask that you come out to as many events as possible.

Sign up here <http://bit.ly/12l6shi> to join the Bird-dog Governor Christie Rapid Response Network, and text "Christie" to 69866 to receive campaign updates and action alerts on your mobile phone.

While the Governor tours the state this fall, let's make sure he knows where the people of New Jersey stand on fracking, and [send a clear message that we won't sit down until we are protected from fracking](#).

Sincerely,

Tracy Carluccio  
Deputy Director  
Delaware Riverkeeper Network
